

Maths – No Problem! Open days at Selby Community Primary School

We offer opportunities to train in mathematics, as a Maths - No Problem! model school. We introduced Maths – No Problem! in September 2015, to the whole school.

Our Open Day provides school leaders and class teachers with a thorough introduction to the Maths – No Problem! scheme and teaching using the Singapore method. This is in addition to 75 minutes of live lesson and learning observations across years 1 – 6 in a 'free flow' manner, the opportunity to talk to teachers and children and presentations as detailed below.

The cost for the day is £120 per person, which includes lunch, refreshments and a full day of training.

Our next open day is on Thursday, 8th February. Please contact Karen Hill (hillk@selby.ac.uk) if you would like to book a place for the day.
